Attachments: OR CZARA Reference Tracking (landslides & pesticides 070114).xlsx

Hi Jenny,

As mentioned yesterday, attached is the updated file for pesticides. Could not locate one reference (below), but everything else from the list you provided has been addressed.

Norris, L.A. and P. Charlton. 1995. Determination of the effectiveness of herbicide buffer zones in protecting water quality, p. 147-152. In: G.J. Doucet, C. Sequin, and M. Giguere (eds.). Proceedings: Fifth International Symposium on Environmental Concerns in Rights-of-way Management. 9/19-22/1993. Hydro-Quebec, Montreal, Canada.

Please let me know if you want to touch base on anything.

Thanks, Amy

Subject: OR CZARA: Revised Landslide and Draft Pesticide Review

Hello all,

Following up on our work from last week, attached is a tracking file that contains the continued landslides review as well as the preliminary pesticides review. Some notes:

- For the landslides, we are at a point where we need to communicate with Chris and/or others before making additional progress.
- For the pesticides, we have a handful of references remaining to review, but will finish this up Tuesday and send an updated copy to Jenny (Jenny, we made it through all of the references from last week and some of them from this morning).

Look forward to connecting more soon.

Thanks, Amy

Subject: OR CZARA: Draft Landslide Review

Hi all,

Attached please find a copy of the reference review for the landslide comments completed to date (draft for Task 5). We have some more references to obtain and/or review for accuracy, but quite a few are addressed. And below is some information regarding color coding/notes/questions.

Hopefully this provides some useful information for the landslides call tomorrow (we will continue to move forward, but wanted to share the current version to keep things moving forward). Also, please note, if you all still have comments on the format of the tracking tables, we can definitely update. This is a good time to make changes.

Thinking forward...

Jenny, do you have a timeline for providing a list of references for the pesticides comments? Even a preliminary list can get us started on those.

Thanks, Amy

Key/Coding:

- Chris provided some summary comment tables that had red/blue font. When these were inserted to the spreadsheet, the font color was maintained consistent with the file from Chris.
- When new comments were added (not in "Coded" spreadsheet or info from Chris), included comment # and "-?" in comment code.
- Where multiple references for the same comment, these are included on separate rows and comment is repeated, but shaded in light grey.
- Where we have not yet obtained a full reference to review or there is a question on the accuracy of the citation provided, the citation is shaded in yellow.

Notes:

- Letters 57 and 77 have been included for landslide comments only... other references in those letters were not added to the "working tab".
- Same as above for the response letter from the State.

Questions:

- If a comment includes a reference and that specific reference includes a citation, should we also obtain that citation and verify the accuracy? This occurred in the Oregon Wild letter (#58) as well as a declaration letter in the NWEA letter (#57).
- In regards to the last bullet in "key/coding" above, how much should we pursue references if the provided citations do not appear accurate? This will likely require some discussion, but we wanted to bring it up.
